DATE: January 29th 2014

SUBJECT: Genetically Modified Organisms Declaration

This declaration covers all Yeast and Yeast Related Products produced by AB Mauri

To Whom It May Concern

This letter is in response to customer requests for information regarding Genetically Modified Organisms.

The current FSANZ legislation requires that “foods produced using gene technology must be labelled where they are substantially different in any characteristic or property of the food compared to their conventional counterpart”.

AB Mauri yeast and yeast related products are produced from selected strains of *Saccharomyces* and hybrids thereof, supplied by AB Mauri Global Technology Group. None of the strains have been subjected to or modified by recombinant DNA technology.

In addition, to the best of our knowledge, all AB Mauri products are not produced with ingredients developed using gene technology. This information is based on information on genetic modification provided by our suppliers.

I trust that this information is sufficient for your purposes. If you require further information, please do not hesitate to contact us.

Yours Sincerely,

A handwritten signature in blue ink, appearing to read 'Peter Skjenar', with a stylized flourish at the end.

Peter Skjenar

Quality Manager
AB Mauri
